

What is different between the PA1200 and the PA2000?

PA1200		PA2000	Why do I care?
	V S		?
Available only for 101,6mm wide printers		Not only available for the 101,6mm wide Tharo H-427 and H-436 but also the 152,4mm wide Tharo H-626 and H-634.	Print and Apply 152,4mm wide labels at 203 or 300 dpi!
508mm wide x 889mm tall x 609,6mm long		381mm wide x 812,8mm tall x 762mm long for 101,6mm wide printers	A smaller footprint means the PA2000 can be installed in locations where other Printer/Applicators cannot.
Location of the Printer Front Panel is fixed		Moveable remote Printer Front Panel	Allows the Printer Front Panel to be repositioned up to 1,5 meters away for easier access!
Requires a different Tamp Pad for every label size printed.		Optional "Universal Tamp Pad"	Provides the flexibility of being able to print and apply labels of varying sizes without having to change tamp pads. A tamp pad and Applicator firmware upgrade is included.
